

Foodborne Illness Wanted Poster

By the end of this project:

- I will be able to identify a foodborne illness and describe what it looks/smells like
- I will be able to explain how it spreads
- I will be able to explain how the FBI affects humans.

Instructions:

- Create a “WANTED” poster about one foodborne illness (FBI)
- Include the following:
 - An accurate depiction/drawing of the FBI even if invisible to the naked eye
 - Hideouts: what foods are tainted with the FBI? How do people contract the FBI?
 - Crimes: What are the symptoms of this FBI?
 - Prevention: Explain 5 things people can do to prevent the FBI from happening in their kitchens.
- Be creative and look up some “Wanted” Posters to help you stay in the theme.
- Some helpful hints:
 - The word WANTED should be large and at the top of the poster
 - The drawing/depiction of the FBI should also be large.
 - Each category (Hideouts, Crimes and Prevention) should have their own spot on the poster around or under the picture.

Rubric for Wanted Poster

Criteria	4	3	2	1
Creative, themed, neat	Poster “wanted” concept is clear, creative and stays with theme	Poster “wanted” concept is clear and creative but a few things are now within theme	Poster “Wanted” concept is somewhat clear, or creative, theme is not visible	Poster “Wanted” concept is not clear, or creative, theme is not visible
Thoroughness of topic	FBI is covered fully with all necessary information and tips	FBI is covered well with most necessary information/tips	FBI is not covered well, some key information and tips missing	FBI is not covered clearly, most/all information is missing
Outcome: Foodborne Illness	Student demos clear understanding of FBI and how they affect humans	Student demos an understanding of FBI and how they affect humans	Student demos some understanding of FBI and how they affect humans	Student demos very little understanding of FBI and how they affect humans
