

A Food's Journey

Choose one food that is imported from another country.

1. Where was the food grown and shipped from?

2. How far away is that?

3. Why can food cross borders so easily?

4. What is the carbon footprint of such a long journey?

5. How does shipping this food to Canada affect the people who grew it?

6. How does importing this food affect growers here?

7. What is the price of this food in a Canadian store?

8. How much of that price do you think the farmer receives?

9. If we grow this food in Canada, why do we also import it?
